DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 8 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants have amended claim 8 to recite 1 mg to about 10 grams to obviate the 112, second paragraph rejection, but have no support for this on page 5 of the specification. It is believed that applicants intended to claim 100 mg to 10g, such an amendment would be supported by the specification.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase, "consisting essentially of" is vague and indefinite since it is unclear from the specification as to what "consists essentially of" would exclude.

Claim Rejections - 35 USC § 102

Claims 1, 2, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Meisner for the reasons of record and for the reasons which follow.

Applicants argue that Meisner has other components in it besides the S-methylcysteine such as calcium, ascorbic acid, etc. It is noted on page 4 of the instant specification that applicants also contemplate including calcium, antioxidants (of which ascorbic acid is commonly used) and the like in with their composition of S-methylcysteine as well. Thus, applicants argument is moot.

Applicants next argue that the composition of Meisner was administered in a different way. Meisner teaches administration of the composition in a variety of ways including oral and topical. Since these include parenteral the argument is moot.

Claim Rejections - 35 USC § 103

Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meisner for the reasons of record and for the reasons which follow.

Applicant provides essentially the same arguments as in the above 35 USC 102 rejection. The above arguments are reiterated here.

Applicant argues that the examiner has not shown a proper case of anticipation under 35 USC 102, but applicant is reminded that this rejection was under 35 USC 103, not 102.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
